

Gantt diagram of tasks:	Year 1		Year 2		Year 3	
	S.1	S.2	S.1	S.2	S.1	S.2
T0. Kick-off meeting						
T0. Project website						
T0. Annual meetings and reports						
T1.1. Organization of an integrated database system						
T1.2. Stocktaking of policy measures that impact rural areas						
T1.3. Case study choice						
T2.1. Global drivers of EU land use						
T2.2. Models for the analysis of EU land changes						
T2.3. The rural-urban dynamics of land use within the EU						
T3.1. Analyse the driving factors underlying local economic performance						
T3.2. Best local practices that favor economic performance						
T3.3. Governance of policy at a local level						
T3.4. Public policies of rural development: ex-post evaluation						
T3.5. Rural development measures in modelling						
T4.1. Mapping of ecosystem services distribution and interactions						
T4.2. Causal factors of ecosystem service bundles						
T4.3. Common bird communities in areas with desirable and undesirable bundles of ecosystem services						
T4.4. Trade-offs and synergies among ecosystem services						
T4.5. EU policies and ecosystem service change						
T5.1. Urban sprawl and ecosystem service bundles						
T5.2. Agriculture practices to save ecosystem services?						
T5.3. Regulating services and agriculture vs urban sprawl						
T5.4. Economic development and ecosystem service bundles						
T6.1. The societal valuation of land use and land conversion: consequences for optimal land use policies						
T6.2. Urban and rural exchanges: policy measures to favor the provision of ecosystem services						
T6.3. Evaluation results and adaptation of the RDP's						
T7.1. Validation of the baseline						
T7.2. Training (understanding and applying used and developed tools)						
T7.3. Consensus building
